Total Person

John Sample

Note:

The Total Person is a combination of all the elements you completed in your Prevue Assessment.

You have superior verbal skills, above average numerical skills, and average spatial skills. Assignments that involve reading and writing will be easiest for you. You will excel at any kind of paperwork or written material. Almost as adept with numbers as with words, you are able to do challenging numerical assignments such as working with complex spreadsheets and data tables. Because you are reasonably proficient in tasks that require mental manipulation of shapes and objects, you will be able to follow routine diagrams, to estimate space requirements, and to read blueprints.

Although you will need a little more time for tasks dependent on spatial reasoning, whenever you can use your exceptional skills in verbal or numerical reasoning, you will learn quickly and your job performance should be above average. You will perform best when the environment and work practices change slowly.

You are extremely motivated when working with people and things, and moderately inclined to work with data. Regarding computer tasks, you would prefer direct communication with others via Internet connections, E-mail, and word processing. Your average interest in information processing means that you will have to exert yourself in any data management tasks and when doing detailed paperwork. Because you like to work with others, you should do well in a position requiring social skills.

You are highly assertive and competitive. You willingly put forth your own views, and have no fear of confrontation or controversy. In pursuit of your goals, you will show little concern for others and may be uncooperative with those who do not share your views. As a decisive leader, you are driven to succeed and will work hard to reach your goals.

You are reasonably well organized, tidy, and accountable. Although you prefer to work in a structured environment, you are flexible and can be innovative if necessary. You prefer the status quo to change for change's sake. However, you can adapt quite readily and are not an obsessive planner. As long as changes are not seen as arbitrary or radical, you can cope with new developments. You can tolerate a relatively constant flow of routine tasks and still deal well with the occasional novelty.

You require continual social stimulation and only rarely do you feel a need to be by yourself. Extended periods of solitude will be frustrating for you. Often wanting to be in the spotlight, you will usually lead any discussion but you are not inclined to take the role of leader all the time in every activity. You enjoy meeting new people and exploring new ideas. You often act impulsively and long-term assignments must include variety or else you will lose interest. You will not tolerate a great deal of monotony and you will thrive on challenging assignments, particularly if these contain an element of risk.

You are sensitive to the emotions of others, and you will generally act appropriately. Certainly, unwarranted criticism can upset your equilibrium, but you will quickly regain your normal good humor. You are not bothered by the ordinary give and take of human relations. You are generally calm and, while aware of stress, you do not let it stop you from achieving your goals. You are relaxed and cope so well with pressure that some might misinterpret your lack of excitability as indifference. Less scrupulous people may attempt to exploit your easy trust and remarkable patience. Ideally, you should work on demanding, high pressure, long-term projects that require dealing with people openly and objectively. Whether you are required to give a fast response to a crisis or methodical attention to a routine task, you will work well under most pressures.

Individual Traits

John Sample

NOTE:

The individual traits on the following pages are descriptions of your characteristics as determined by the Prevue Assessment. The 1 - 10 scoring scale used throughout the Prevue Assessment is called a sten scale. Sten simply means the standard tenth of a normal bell curve. Approximately 16% of the population would have sten scores in the 1 - 3, and 16% in the 8 - 10 ranges. The other 68% of the population will score in the middle ranges 4 - 7.

General Abilities

You scored in the high average range of General Ability. You are at a level of speed and accuracy typical of the top third of your fellow workers when handling information, reasoning and solving problems. Your learning faculty is reasonably quick and you will absorb new information with little difficulty. Changing job requirements should not affect your ability to perform.

Working with Numbers

You are at the higher end of the average range for Numerical Reasoning. This is typical of employees who are skilled and competent in reasoning with information derived from simple numbers.

Working with Words

This indicates the highest level of ability to use language as a vehicle for reasoning and problem solving. You are in the top percentile of the general working population in your use of written language.

Working with Shapes

Your score places you at the lower end of the mid-range of scores in spatial ability. You have a normal level of speed and accuracy when reasoning with information that involves thinking about manipulating shapes and objects.

Individual Traits

John Sample

Working with People

You show an average level of interest in work that involves dealing with people. You are likely to prefer jobs requiring a reasonable degree of contact with others and would not be happy working on your own for extended periods of time.

Validity

John Sample

VALIDITY INTRODUCTION:

- The rules for identifying patterns of responses in the Personality Section of the Prevue Assessment which might be "invalid" include systematic, but non-meaningful response patterns, omissions and excessive use of the "B" answer option. Systematic, but non-meaningful response patterns occur when the distribution of the responses differ from the norm and are considered unusual. The omission rule occurs if more than three responses are omitted in a given scale, making the results appear more average than they are. The "B" answer rule is affected by the total number of "B" responses selected. You had a choice of an "A", "B", or "C" for every question in the Personality Section of the Prevue Assessment. The second option, the "B" choice, is always an unsure or in-between answer.

VALIDITY COMMENTARY:

- The total number of "B" responses that you chose in the course of completing the Prevue Assessment Questionnaire, including questions that were not answered, was 7.
- This number of "B" choices is within acceptable levels and the results of the Personality section of this report had meaningful response patterns. Therefore the data presented in this Prevue Assessment can be considered accurate and reliable.

The use of the Prevue Assessment will help to ensure that you are treated fairly without regard to race, colour, religion, sex or national origin. The Prevue Assessment was designed and developed to conform with the human rights legislative and best practice requirements prevailing in the various countries where the Prevue Assessment is distributed. This includes the EEOC Guidelines, the Americans for Disabilities Act and the standards for test development and administration published by the American Psychological Association, the British Psychological Society and the Association of Test Publishers.
